

Callum O'Connel has a MPhil in Marine Science. Previously oversaw the technical and operational duties of the UK's first commercial seaweed nursery. Background in macroalgae research, in particular the molecular characterisation of commercially relevant seaweeds and their pathogens cultivated in European (GenialG) and tropical (Global Seaweed Star) ecosystems. Currently works as one of Notpla's Seaweed Sourcing Managers, with a focus on identifying and testing new unrefined biomass for our early stage products.
