

Ilja Gasan Osojnik Črnivec is a research associate in renewable technologies at National Institute of Chemistry (NIC) and assistant professor of food chemistry at the University of Ljubljana, Biotechnical Faculty. He is experienced researcher in studies of inorganic and organic materials, catalysis, and biotechnology. He is member of the core group of researchers at the Center for Carbon-Free Technologies (NIC) enabling decarbonisation with H₂, CO₂ and waste valorisation. At Biotechnical Faculty (UL), his research focuses on bioactives and microbial encapsulation. He is heading several research projects and is well published in peer review publications and patents.
