

Małgorzata Kozak - GIS specialist, is working in the Institute of Soil Science and Plant Cultivation, Department of Bioeconomy and Systems Analysis. In her work she uses GIS systems, remote sensing and tools for database management, spatial analysis and geovisualization in the context of research projects for bioeconomy research, agriculture, agroforestry and nature conservation. She was/is involved in few H2020 projects (e.g., BioEcon, BioReg, AFINET), FP7 projects (e.g. - S2BIOM, BioBoost,) and several national projects (LCAgri, BioMAgic, Techrol, SmartVillages, Agricultural Drought Monitoring System, EcoServ-Pol). Her main research interests are use of GIS and remote sensing methods in environmental research. (HI =6; 202).
