

Ivan Blanco, PhD, works at the R&D department of Aqualia with more than 15 years of experience in water and wastewater treatment. He holds a Master's (Florida International University, USA) and a PhD (Universidad de León, Spain) in Environmental Engineering focused on Nature-Based Solutions for wastewater treatment, with international experience in the US and UK. He has 5 years of experience in the British water utility sector (Severn Trent), where he has held process design responsibility over major projects such as Rugby BioMag or Finham THP. Since June 2021, he joined Aqualia as researcher and project manager of the projects LIFE INTEXT and H2020 NICE, that are part of the portfolio of projects that the company runs in the field of Nature-Based Solutions.
