

Aris Jansons, senior researcher, professor. Leader of the development of tree breeding program for main commercial tree species in Latvia, now being implemented in practice, producing seed material for regeneration of 10000 ha annually. Currently main research topics are related to forest adaptation (natural disturbances: wind and fire) – development of forest wind resistance models and recommendations for establishment and management of resilient stands. Assessment and modelling of carbon balance in old-growth forest and forest originating from improved plant material. Lead auditor of forest management (FSC, PEFC).
