

Miguel Almeida is Senior Researcher at ADAI and Invited Professor at the University of Coimbra. He completed his Ph.D. in 2011, specializing in Natural and Technological Risks, with a focus on wildfires, a field he has been dedicated to since 2003. In his curriculum, he is listed as an author and co-author of numerous national and international scientific publications, as well as various technical reports. Noteworthy among these are the reports on the 2017 wildfires in Pedrógão Grande and October 15, as well as reports on major wildfires in 2022 and 2023 commissioned by the Ministry of Internal Affairs.
